JOIN THE TEAM.
CHANGE THE GAME.
Team up with Benaroya Research Institute

BE A PART OF BRI RESEARCH
At Benaroya Research Institute, we’re on a course to further scientific understanding of the human immune system. Together with researchers, clinicians and volunteers across the Puget Sound, we are ushering in a new era of medical treatments, innovative therapies, and future cures for immune system diseases that affect millions.

BECOME A GAME CHANGER
When you volunteer to participate in research, you play a critical role in moving science forward. Your sample will be used by scientists to learn more about the immune system and how to predict, prevent and ultimately cure life-changing diseases that impact us all.

Breakthroughs start with people like you!

WHO CAN JOIN
People of all ages, those with and without immune system diseases, can participate in BRI research.

- Age 1 and older
- Able to travel to Seattle area
- Willing to share health data
- 30-45 minutes per appt.

Participants will be compensated for their time.

GET STARTED
More Information
To sign up, visit: BenaroyaResearch.org/signup
If you have questions, email us at biorepository@benaroyaresearch.org

1 Sign Up
When you volunteer to give blood and share health data, you help advance important research that leads to future treatments and cures.

2 Talk to Us
We’ll be in touch to answer your questions, ask a few screening questions and schedule an appointment that is convenient for you.

3 Give Blood
At your appointment, we create your health profile and you give blood. Each sample is labeled by number only to ensure your confidentiality.
**IMMUNE SYSTEM DISEASES CAN AFFECT ANY PART OF THE BODY**

### Endocrine System
- Type 1 diabetes
- Autoimmune thyroid diseases
  - Graves Disease
  - Hashimoto’s Thyroiditis
  - Addison’s Disease
- Polyendocrine deficiency syndrome type 1
- Polyendocrine deficiency syndrome type 2
- Polyendocrine deficiency syndrome
- Autoimmune Diabetes Insipidus

### Blood
- Immune Thrombocytopenic Purpura
- Pernicious anemia
- Autoimmune Hemolytic Anemia
- Autoimmune Thrombocytopenia
- Paraneoplastic Autoimmune Syndromes
- Autoimmune Hemophilia

### Nervous System
- Multiple Sclerosis
- Myasthenia Gravis
- Guillain-Barre Syndrome
- Autoimmune neuropathies

### Gut
- Crohn’s disease
- Primary biliary cirrhosis
- Autoimmune Hepatitis
- Celiac Disease

### Muscle & Joints
- Rheumatoid arthritis
- Sjogren’s Syndrome
- Scleroderma
- Systemic Lupus Erythematosus
- Ankylosing Spondylitis
- Psoriatic Arthritis
- Dermatomyositis
- Relapsing Polychondritis
- Behcet’s Disease
- Antiphospholipid syndrome
- Lupus
- Mixed connective tissue disease
- Vasculitis

### Skin
- Psoriasis
- Vitiligo
- Pemphigus
- Pemphigus Vulgaris
- Pemphigus Foliateus
- Bullous Pemphigoid
- Alopecia Areata
- Dermatitis herpetiformis

### Eyes
- Autoimmune uveitis
- Autoimmune eye diseases
- Neuromyelitis optica

### Kidney
- Glomerulonephritis
- IgA nephropathy
- Goodpasture syndrome
- Interstitial Cystitis

### Lung
- Autoimmune orchitis
- Autoimmune oophoritis
- Antiphospholipid syndrome
- Autoimmune Urticaria
- Myelopathy
- Asthma

### Systemic
- Allergy
- Cancer
